

TOWN OF WESTPORT ISLAND
6 Fowles Point Road
Westport Island, ME 04578

Office of the Selectmen, Assessors and
Overseers of the Poor

WELL RESULTS FORM

The Town of Westport Island has a major objective to *help preserve the quantity and the quality of the Island's groundwater* for all of our residents.

To that end, the Town requests that you provide the following information to us once it becomes available to you. Please complete the data below, as available, and return this report to the Town Office

Property Owner & Address _____

Map & Lot # _____

Well drilled date _____

Well Depth _____

Well Casing Length _____

Depth to Bedrock _____

Depth to Water _____

Well Gallons per Minute (GPM) _____

This information is commonly stamped on the underside of the well cap, and should also be available from the well installer.

The Town also suggests that your water supply should be tested as you start using your well and periodically every few years thereafter. If you do so and are willing to share the data with us, we can add your results to our overall monitoring of water quality on the Island. You can obtain a sampling kit from the Town Office. If you are willing to share the results with us, as indicated in the kit, the Town has kits with prepaid postage available.

The Town intends to use all available well data to track groundwater characteristics throughout the Island. This will help us to see if there is a pattern that may or may not require recommendations regarding future development.

Your cooperation is appreciated.
